

Task 2

Explanation

1. If a number is divisible by both 3 and 5, it prints “FizzBuzz” instead of the number.
2. If a number is only divisible by 3, it prints “Fizz”.
3. If a number is only divisible by 5, it prints “Buzz”.
4. Otherwise, it just prints the number itself.
5. Incorrect range function usage: The range(1, n++) is incorrect. It should be range(1, n + 1).
6. Incorrect indentation or syntax highlighting: The code might not run correctly in its current form
